

Vector-borne diseases increasingly threaten public health in U.S. homes, neighborhoods, and communities. Coordinated efforts are needed to reverse this trend nationwide.

Vision

Engage, educate, and empower citizens to implement sustainable strategies to reduce vector-borne illnesses.

Mission

Protect people, pets and pollinators in homes, neighborhoods, and communities,
Naturally!

Take Action

Let's work together to embrace a community-wide educational model implementing innovative techniques while employing eco-friendly botanical chemistry to better protect our families.
