

Vector-borne diseases are a growing threat to public health in homes, neighborhoods & communities throughout the United States. Addressing this issue requires a coordinated and sustained effort to reverse this trend nationwide.

Vision

Engage, educate and empower citizens by teaching them to use effective strategies to reduce vector-borne diseases.

Mission

Protect people, pets and pollinators in homes, neighborhoods, and communities.

Take Action

Let's work together to embrace a community-wide educational model implementing innovative techniques and strategies to reduce vector-borne illnesses.
